Domestic Liners

- 5 year pro rata warranty on all 20 thou and 30 thou liners
- Material is impregnated with algicide
- Material samples available
- Each liner is now supplied with a serial number for hassle free replacement

Points common to all liners:

- Ensure the pool structure is compatible with being in contact with PVC materials.
- 29°C maximum pool water temperature.
- Do not install in air temperatures of less than 10°C as the material will become stiff and difficult to fit evenly.
- Due to the material being flexible during the printing and cutting processes, patterns cannot be made to match along the weld lines or cut edges.
- Issues with the aesthetic finish are not accepted as a warranty issue.
- Occasional vertical weld joints in the wall are unavoidable and placed at our discretion unless instructed at time of order.
- Patterned materials may show a thin white line along the weld edge. This is due to the white base material flowing during the weld process and is a normal part of a good weld (this is not accepted as a warranty issue).
- Liner colours shown in print may vary slightly from materials received.
- Every effort is made to match patterned material colours but these naturally vary, even within the same batch.
- Liners requiring complex drawing or manufacturing may be subject to additional lead time.

Coloured Beading:

Plastica offer a selection of different colour beading other than white to suit the pool surroundings and/or the liner colour. Also available is Adriatic Blue, Green, Light Blue, Grey and Black. Please enquire when placing your order if you require a specific colour of bead. As standard Plastica will fit the colour that best matches the particular colour/pattern liner.

Note: The Kafko Posilock beading that Plastica stock is only available in Adriatic Blue.

Domestic Liners

Unique Serial Numbers

All liners are now embossed with a serial number along with the Plastica logo which easily identifies that it is a Plastica liner. This will be situated in the centre of the width just below the beading on deep end walls unless an alternative position is requested in writing at time of order. Please quote this number to customer services when ordering a replacement liner for this pool and we will have the exact dimensions.

Motifs

- Dolphin design or your own bespoke motif
- Cut out of plain vinyl and welded to liner
- Individualise your pool

Note: When ordering motifs please give a diagram with precise dimensions and location on liner.

Motifs

DISCOUNT/ PRODUCT CODE	DESCRIPTION	PRICE EACH
A PLI600S	Dolphin Motif Standard 7' Length	388.42
A PLI602S	Dolphin Motif Standard 4' Length	352.48

Bespoke Liner Calculation

- Liners are priced per chargeable metre and calculated as below
- Dimensions are converted to the nearest square metre for invoicing purposes
- 0.5mm (20 thou) or 0.75mm (30 thou) thickness available
- Wall heights should include 150mm for overlap if required

- Quotes should be obtained for irregularly shaped or pools under 40sq.m. as these can incur surcharges
- Small liners charged at flat sheet price (plus surcharge of £176.33)
- Complex liners may require up to 5 days extra lead time.
- Complicated liners and those with small detailed areas can be prone to small tension lines or creases

INCHES	1"	2"	3"	4"	5"	6"	7"	8"	9"	10"	11"
FEET	0.083	0.167	0.25	0.333	0.417	0.5	0.583	0.667	0.75	0.833	0.917

These figures are a guide on shaped pools. See the following for irregular shaped pools.

Rectangular constant depth type liners

Surface area of floor = length x width
 Surface area of wall = perimeter x wall height
 Example: Pool size 16' x 32' with constant depth of 4' 6"
 Surface area of floor = 16' x 32' = 512ft²
 Surface area of wall = (16' + 32') x 2 x 4.50 = 432ft²
 Total surface area = 944 x 0.0929 = 88m²

Shaped walled type liners

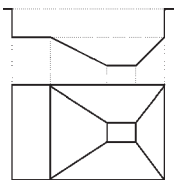

Surface area of floor = length x width.
 Surface area of wall = perimeter x maximum depth
 Example: Pool size 16' x 32' with maximum depth of 7'
 Surface area of floor = 16' x 32' = 512ft²
 Surface area of wall = (16' + 32') x 2 x 7 = 672ft²
 Total surface area = 512 + 672 = 1184 ft² x 0.0929 = 110m²
 Note: Maximum wall height is used as the factor in calculating surface area of wall.

Hopper and Wedge type Liners including constant depth pools with wall-to-floor reveal

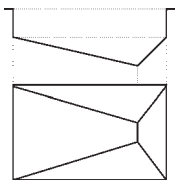

Surface area of floor = length x width x 1.3*
 Surface area of wall = perimeter x wall height
 Example: Pool size 16' x 32' with a wall height of 3' 4"
 Surface area of floor = 16' x 32' x 1.3 = 665.6ft²
 Surface area of wall = 96 x 3.333 = 319.97
 Total area = 985.57 x 0.0929 = 92m²
 *1.6 to calculate for oval type liners.
 1.7 to calculate for kidney type liners.
 2.25 to calculate for dished and kidney Capri type liners.

Round constant depth type liners

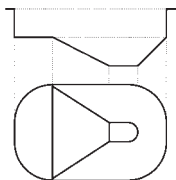

Surface area of floor = the diameter of the pool squared
 Surface area of wall = (3.14 x diameter) x height of wall
 Example: Pool diameter 20' x 4' wall height
 Surface area of floor = 20' x 20' = 400ft²
 Surface area of wall = (3.14 x 20') x 4' = 251.2ft²
 Total surface area = 400 + 251.2 = 651.2 x 0.0929 = 60m²

Surveys for Complicated Liners

We offer a Surveying Service for complicated pool shapes – see page 6 for details.

Note: Pools being surveyed for domestic liners must have the old liner completely removed and be empty of water to allow the surveyor good access or a rescheduled visit and extra costs will be incurred.

Above Ground Pool Liners

Made in the UK

- Overlap Liners

Diameter Liners

DISCOUNT/ PRODUCT CODE	DESCRIPTION	PRICE EACH
L SAL012	12' x 3' (8 thou)	98.00

Extreme 3D Pool Lining

Installed by
Plastica

New Build
& Liners

3D Rustic

3D Sandstone

3D Slate

An addition to the Extreme range of lining is the 3D range of patterns. Manufactured in 2mm thick reinforced material incorporating a natural looking textured surface that makes it feel totally unique.

The 3D patterns are designed to give you a completely different swimming experience and give the effect of swimming in a natural environment. As you would expect from an Extreme lining the material has multiple layers of protective lacquer to keep the liner looking as good as new from day one, whilst resisting the ageing and challenging conditions of a swimming pool.

The Extreme 3D range is available in three distinctive patterns, 3D Slate, 3D Sandstone and 3D Rustic are all manufactured and designed to make swimming in your pool a pleasure for years to come.

For a sample swatch and more information about the Extreme Pool Lining System call Pat Devaney on 01424 857741 or email: pat@plasticapools.net
