# AUTOMATIC ABOVE-GROUND COVERS

## EVODECK SERIES E

### Evodeck, the best in protection, safety guaranteed

Evodeck belongs to our range of Delta covers; safety covers that offer the best possible protection against accidental falls into a pool.

Evodeck complies with the French safety standard NF P 90-308 and allows you to enjoy your pool with complete peace of mind.

### SERIES E

#### Temperate water

Evodeck shelters your pool against cool nights and cold gusting winds. You can begin your pool season in early spring and extend it into late Indian summers.

#### Up to 100 kg per m<sup>2</sup>

Featuring three air cells per slat, and an anti-deflection system that limits inclination of the slats, it is the outright winner in every flotation category.

#### Pure water

Evodeck covers have an opacity coefficient that inhibits photosynthesis and hence the growth of algae. Your pool water is cleaner and needs less filtration time and water treatment products.

#### A simple, cleverly designed system

Evodeck is a Delta cover, designed and manufactured by a market leader.

**With Evodeck,  
your summer lasts longer**

**Become  
an ecocitizen**

# EVODECK PROTECTS BEAUTIFUL POOLS, AVAILABLE IN 2 VERSIONS

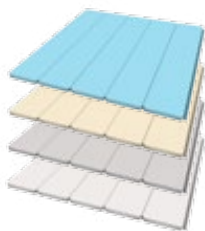

**MAXIMUM DIMENSIONS:**  
Maximum dimensions of a  
Evodeck EC cover,  
6.09 x 14.00 metres

By keeping your pool clean and reducing filtration time, Evodeck saves on energy and on pool chemicals.

Because Evodeck reduces the quantity of water treatment products necessary, it lessens your pool's ecological impact on the environment.

Lastly, as part of its overall environmental design, the PVC that makes up your cover can be recycled. With Evodeck, you get cutting edge technology and reduce your environmental foot print.

**Evodeck offers a wide choice of colours for your slat cover**  
White, Beige, Grey,  
Light blue

## Delta Lock fasteners

A wide choice of colours for your Delta Lock safety fasteners.

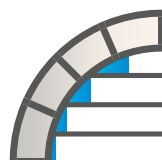

8 Delta Lock fastener colours are available:  
Light Blue, Dark Blue, White, Caribbean Green, Beige, Grey, Anthracite grey, Black.

## The slat finish

- Delta covers can be made to fit straight steps, roman steps, even free-form steps.
- Two type of finish are available, stepped or smooth.

Stepped finish

Smooth finish

## EM Manual

### Hand operated

Quick and easy to install and excellent value for money. No wiring required.

A reduction gear allow the cover to be rolled up effortlessly.

- Can be retrofitted with a motor,
- No wiring,
- Quick to install,
- Rolls up effortlessly using a wireless drill (not provided).

## EC Mains

### Mains powered

Simple and reliable, this model comes with a power unit that is installed in the plant room.

- Quick to install,
- An ultra-silent, 250 Nm reduction geared motor,
- With or without ends of travel,
- Simplified maintenance and winterizing,
- Electrical panel integrated into the end stand,
- Corrosion proof end stand.

## Step finish

Roman steps

Straight steps

Free-form steps

The standard NF P 90-308 prohibits an uncovered gap of more than 250 mm.

If it is observed that in some areas this finish would result in a gap of more than 250 mm between the cover and the pool wall, a smooth finish will be mandatory and automatic in these areas.

## SERIES E

### Unique slat design

- The best air/ slat thickness ratio available on the market,
- Ultrasonically welded end plugs: guaranteed to be watertight,
- Beautiful down to the smallest detail, the end plugs are colour matched to the slat.

### The benefit is three-fold

- Firstly, the air volume/slat thickness ratio ensures excellent cover buoyancy compared to other covers with thicker slats, this increased buoyancy limits the displacement and evacuation of water when the cover is deployed.
- Furthermore, the slats are absolutely leaktight, water cannot enter the air cells. The air trapped inside is thus static and dry, guaranteeing optimum thermal insulation.
- Lastly, because the slat cover is extremely buoyant, it has an excellent load bearing capacity and can easily support the weight of a grown man. This unique slat is an additional safety element.

### An exclusive anti-tilt mechanism

- Like all Delta covers, Evodeck covers feature an anti-tilt mechanism that allows the smallest angle of deviation of any slat cover available on the market. This limits the amount that the cover can sink into the water under the weight of a man, and so offers even better protection in the event of an accidental fall.
- Featuring three air cells per slat, and Evodeck covers are the outright winner in every flotation category, they can bear a load of up to 100 kg per m<sup>2</sup>.

### Slats that simply slide together

- Easy assembly of the slat cover,
- The slat hinges are not damaged as they could be if the slats were clipped together,
- The covers are delivered in sections of 6 pre-assembled, assembly is 2 to 3 times faster.

### Clean, temperate water

- The slat cover prevents photosynthesis and inhibits the growth of algae. Your water is cleaner, so it needs less filtration time and fewer water treatment chemicals.
- Evodeck covers protect pools from cool nights and cold, gusting winds. You can

start your pool season earlier in spring and extend it into late Indian summers.

- Lastly, the undulating contour of the surface in contact with the water encourages heat exchange, the water is warmer and slat cover dilation phenomena are significantly lessened.

### Beautiful

- Evodeck covers are designed to follow the contours of your pool. The extensive colour palette allows you to add a touch of refinement to your pool.

All our slat covers wider than 2.5 m comply with the French safety standard NF P 90-308

### Legal information

All Delta covers comply with the French safety standard NF P 90-308 (May 2004 concerning pool protection) in as far as all elements comprising the cover are supplied by PROCOPI. Pool safety cover intended to deny children under the age of five access to the pool. This cover is no substitute for common sense or individual responsibility, nor is it intended to replace the vigilance of parents and/or responsible adults which remains the key factor in ensuring the safety of young children.
