

PRE-TAILORED POOL STEPS

Liner step sections can be incorporated into a pre-tailored liner.

Aquaflex has revolutionised what can be done with a pool liner. Gone are they days when anything out of the ordinary was deemed impossible.

Aquaflex has pioneered the incorporation of lined steps into a pre-tailored liner. The benefits are enormous, for renovating old and new pools where a less expensive option than a fibreglass or acrylic step is desired. Moreover the problem of matching the colour of the liner to the colour of the step disappears.

Almost any size and shape of step can be lined in this way, as long as clear and accurate drawings are supplied. **The only stipulation is that there must be an absolute minimum of 6" (0.15 m) of water covering the top step in order to prevent movement of the liner.** The sketches below give an idea of the selection of the step designs that is possible. Step edges should be finished with a very small "pencil" radius to prevent sharp edges and sand bags or other ballast should be used during filling to help keep the liner in position.

Square Step

Motifs & Logos

Why not make your pool liner a little bit special by adding a printed motif. Just supply us with the high resolution art work or, if you have something in mind, like the Dolphin shown here, just give us a call to discuss.

Simpler motifs, such as the Dolphin shown below can be welded onto your liner. We have a selection of motifs here such as a turtle, seahorse, sealion and butterfly.

Aquaflex Liner Clean

Aquaflex Liner Clean is the recommended non-abrasive PVC Liner/Tileband cleaner. It will deal with the most stubborn scum line deposits and calcium build up.

It has been specifically designed to remove build up of scale, scum and body fats from the most wet surfaces, without affecting the PH levels or TDS levels of the pool water. This multi purpose descaler is suitable for use on PVC pool liners, tiled surrounds, acrylic spas and fibreglass.

WARNING: If the pool has an automatic salt chlorination system without the correct dosing control, there is a great danger that the pool water will be over chlorinated. This will result in colour/pattern loss of the pool liner. PLEASE SEEK SPECIFIC ADVICE FROM YOUR SALES CHLORINATOR SUPPLIER.

Anti-slip

We strongly recommend anti-slip for steps
