Coverdeck, the best protection available

Safety guaranteed

A Coverdeck cover, like all Delta covers, is the best available means of preventing accidental falls into a pool.

Coverdeck complies with every stipulation of the French standard NF P 90-308 and allows you to enjoy your pool with complete peace of mind.

With a simple twist of a key and in just a few seconds, your cover closes effortlessly over your pool. Your pool is secured. Your peace of mind guaranteed.

Beautiful

Coverdeck combines effective and reliable protection with an undeniable visual appeal. Each cover is designed to harmoniously follow the contour of your pool and the wide choice of slat colours allows you to add an additional touch of refinement.

Coverdeck, the best, and most beautiful, protection available.

A simple, cleverly designed system

Coverdeck is a Delta cover, designed and manufactured by a market leader.

Pure water

Coverdeck covers have an opacity coefficient that inhibits photosynthesis and hence the growth of algae. Your pool water is cleaner thus economising filtration time and water treatment products.

Temperate water

Coverdeck shelters your pool against cool nights and cold gusting winds. You can begin your pool season in early spring and extend it into late Indian summers.

With Delta, you can relax.

Become an ecocitizen

By keeping your pool clean and reducing filtration time, Coverdeck saves on energy and on pool chemicals.

Because Coverdeck reduces the quantity of water treatment products necessary, it lessens your pool's ecological impact on the environment.

Lastly, as part of its overall environmental design, the PVC that makes up your cover can be recycled. With Coverdeck, you get cutting edge technology and reduce your environmental foot print.

Maximum dimensions
(step included)
6.09 m x 14 m

Perfectly discreet and beautiful, down to the finest detail

Coverdeck covers are mounted in the area between the water line and the coping, so they are totally hidden from view. Nothing can be seen above the water line. The visual appeal of your pool surroundings is carefully preserved.

• Easy to use

A key operated switch, mounted near the pool and out of reach of children, commands operation of the slat cover while allowing the user to keep an eye on the pool to ascertain that no-one remains in the water while the cover is moving.

• Steps

Delta covers can be made to fit straight steps, roman steps, even free-form steps. Two type of finish are available, stepped or smooth.

Coverdeck, the best protection available

► Innovation

The motor is mounted above the water line. Its casing protects it against intermittent splashing. Furthermore it may be easily accessed, no dismantling required.

An exclusive anti-tilt mechanism

Like all Delta covers, Coverdeck is fitted with an anti deflection system that blocks the slats, preventing them from tilting more than 15° towards the bottom. This is the smallest angle of deflection achieved by any slat cover available on the market. This confers an increased load bearing capacity on the cover and and so, better protection for you.

An exclusive, patented anti-tilt mechanism. To achieve the smallest angle of deflection of any slat cover on the market. To further enhance safety

1 Slat cover

Coverdeck slats come in five different colours. Choose yours.

White, Beige, Grey, Light blue or Translucent blue.

2 Delta Lock safety fasteners

Select your Delta Lock fastener colour from the palette available.

9 Delta Lock fastener colours are available: *Light blue, Dark blue, White, Caribbean Green, Beige, Grey, Anthracite grey, Black and translucent blue.*

Stainless steel fasteners

3 Beam

Choose your beam colour from among the four options offered.

White, Beige, Light blue, Grey, Anthracite grey and Black.

4 Pit wall

each pit wall is custom made in the factory. Pit walls are compatible with all pool water proofing methods (tiles, liner, reinforced PVC, etc.). The Coverdeck pit wall mounting plates are fitted under the coping on either side of the pool, the pool waterproofing is not pierced.

White Beige Light blue Grey Anthracite grey Black

Class 4 autoclaved pine

Unique slat design

The best air volume/ slat thickness ratio available on the market

- *Ultrasonically welded end plugs: water tightness guaranteed.*
- *Beautiful down to the finest detail: the end plug colours match the cover colours.*
- *Coverdeck covers are made of high quality PVC that confers excellent strength, despite the thin air cell walls*

Some of the most important advantages offered by Coverdeck covers are a result of this unique slat design; a large volume of air trapped inside the minimum amount of plastic.

The benefit is three-fold:

- Firstly, the air volume/slat thickness ratio ensures excellent cover buoyancy compared to other covers with thicker slats, this increased buoyancy limits the displacement and evacuation of water when the cover is deployed.

- Furthermore, the slats are absolutely watertight, water cannot enter the air cells. The air trapped inside is thus static and dry, guaranteeing optimum thermal insulation.

- Lastly, because the slat cover is extremely buoyant, it has an excellent load bearing capacity and can easily support the weight of a grown man.

The little 'extras' that make the difference

PROCOPI
Pool Systems

Your pool, just as you imagined it...

Procopi Pool Systems is a software tool, available exclusively from Procopi, that allows to preview and customise your **waterproofing**, your **pool fittings** and your **automatic cover**.

You have everything you need to create your dream pool...

Maintenance made easy

Delta covers require little maintenance; they are designed to stay clean. When it comes to winterizing, Delta facilitates your life even further: the motor block on the motorised models is very light and can be removed with no tools in just a few seconds.

Summer and winter, Delta, offers the best possible protection.

Legal information

All DELTA covers comply with the French standard NF P 90-308 (May 2004 version concerning pool protection) if all items comprising the cover are supplied by Procopi.

Pool safety cover intended to deny children under five access to the pool.

This cover is no substitute for common sense or individual responsibility. Nor is it intended to replace the vigilance of parents and/or responsible adults that remains the key factor in ensuring the safety of young children.

Reduces evaporation from indoor pools

On indoor pools, the cover slats form an effective barrier that prevents evaporation and subsequent condensation on walls and windows. This barrier also significantly reduces heat loss and generates cost savings.

Unrivalled know-how

With the Delta range, PROCOPI offers you years of experience along with ultra-modern manufacturing tools that, together, ensure perfectly repeatable, strictly controlled, top quality production methods.
